13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Plunger lift system installed on well 6/22/95. Well currently undergoing production test. Independent Pipeline Corporation's Natani Gathering System line layed to nearest well (Alamos Canyon #7, NENW 7-21N-6W), approx 2.5 miles east. If the well proves economically viable, West Largo Corp. will lay 2" line from well to connect with Natani System.

West Largo Corp. is hereby requesting that the SI status of this well be extended six (6) months until 1/1/96 to allow for testing and construction if necessary. If the well proves incapable of producing hydrocarbons in paying quantities, West Largo Corp. proposes to plug and abandon the well per the procedure described in the associated Sundry Notice dated 6/23/95. West Largo Corp. hereby requests that the casing integrity test be delayed until such time as the well is connected to the gathering system. It should be noted that the well is cemented from surface to TD.
