17. NATURE OF PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting and proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Gary-Williams Oil Producer, Inc. originally planned to propose completion of the San Isidro 6, #13 well in the summer of 1986. However based on the industry wide economic status at this time, we feel that all parties would go non-consent on an AFE to complete and equip this well. GWOP requests permission to delay any completion attempt until no later than 2 years after spud date which would be January 31, 1987. Hopefully economics will improve by that time. In the event that economics do not improve, GWOP will propose establishing commercial production if possible rather than allow potential reserves to go untested. Thank you for your consideration.
