13. Describe Proposed or completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Merrion Oil & Gas proposes to continue shut in status for the subject well. The well was drilled in 1997 and the wellbore is in good condition. It is capable of producing significant reserves, however, a submersible pump is required to lift the water and oil. It is uneconomic to repair the sub pump at this time due to low oil prices. We request that long term shut in status be continued until oil prices improve.
