Well Plugging

Elmer L. White Walker Dome #2 19-16N-09W, API 30-031-05089

Rand,

This well is in the Nerdlihc, Bullseye field . There is no control for this well. The casing is sticking up about 6". There is no wellhead or valve on the pipe. I would like to place this well on the contract to be plugged at the same time as the bullseye wells. Thanks for your help
