Re: #1 Bejunje Federal
 Section 24-23N-9W
 San Juan County, New Mexico

Gentlemen:

Yates Drilling Company hereby makes application for approval to vent gas from the captioned well in accordance with NTL-4A, IV-B.

The Bejunje Federal well produces approximately 16.5 MCF per day. We use an estimated 10 to 15 MCF per day to operate the pumping unit and the heater on the separator.

We feel like the gas volume produced is too low to justify the expense of a pipeline connection.

Your consideration of the above will be appreciated.

Sincerely,

YATES DRILLING COMPANY

John Rhodes

T.L. Rhodes

Engineer
