

Details of Work

The Operator proposes to drill a Pictured Cliffs test to a total depth of approximately 3000' to test for oil and gas.

The following is a brief outline of the proposed work:

Shooting:

Fractured	2000'
Pictured Cliffs	3000'

Casing Program

Surface Casing: 9-5/8", 210' at 150' with sufficient cement to circulate.

Production Casing: 7", 220' & 220' at 3000' with 150' annulus.

Coring Program:

No cores will be taken, unless warranted.

Drill Stem Testing Program:

All shows of oil or gas will be tested.

Other Proposed Work:

1. An electrical log will be run from shoe of surface casing to total depth.
2. Ten feet samples will be caught and cased from the shoe of surface casing to total depth.
3. Cores will be taken of the Pictured Cliffs sand, if warranted.
