URGENT 10/10/68

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing. Water fractured from 2236 to 2340, with 20,000 gallons of water and 15,000 lb of sand, breakdown pressure 1600 lb, freeting pressure 700 lb, infection rate 28 barrels per minute. Well cleaned itself out after 4 hours of swabbing. Estimated open flow 2000 MCF.
