If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and pertinent to this work.)

Operator has re-evaluated cement log run 9-11-79 and intends to perforate at 6217, 6221, 6225, and 6229. We will then set a packer above new perfs and break them down with water. If we do not break around on the back side we will sand water frac the new perfs.

Verbal approval obtained from Mr. Becker 6/27/80.
