The elevation of the derrick floor above sea level is 6535 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to plug and abandon the non-commercial Greenhorn zone in this well plugging the 2 7/8" Greenhorn casing string with cement from 5890' to 5950'. The Greenhorn formation is non-commercial in this well and it is desired to use the 2 7/8" casing for Mesa Verde production.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
