Oil Conservation Commission  
1000 Rio Brazos Road  
Aztec, New Mexico

Gentlemen:

Reference is made to your letter dated October 17, 1962, regarding overproduction on our Federal 17-32 #1 lease for the month of August in the amount of 628 barrels.

According to our calculations, the Federal 17-32 #1 lease overproduced 376 barrels during the month of August, 1962. This is based on Supplement to the Oil Proration Schedule dated June 29, 1962 which shows the allowable to be 70 barrels per day or 2170 barrels for the month of August. Standard's production was 2546 barrels during the month of August.

Please review this matter and advise if our calculations are correct. We will adjust our production rate accordingly to make up the overproduction.

Yours very truly,

*S. J. Mathews, Jr.*
