The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill well No. 2 to approximately 3450' to test the Pictured Cliffs formation. We plan to use 160' 10-3/4" casing for surface and 3450' 5-1/2" casing for production; each to be cemented with 200 sacks regular cement. The designated drilling unit is the 3 3/4 Section 31.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
