OIL CONSERVATION COMMISSION
1000 RIO BRAZOS ROAD
AZTEC, NEW MEXICO

March 21, 1963

Skelly Oil Company
P.O. Drawer 510
Farmington, New Mexico

Attn: Mr. J. W. George
Assistant District Superintendent

Dear Sir:

We have received your letter of March 15, 1963 requesting a change to 1963 deliverability tests for allowable purposes for your L. L. McConnell #3 well in the SW₄ Section 31-25N-3W.

The information which you have submitted seems to indicate that the 1963 test does more nearly represent the capability of this well than does the 1962 test. We are, therefore, issuing a supplement using the new test effective March 18, 1963, which was the date we received the test.

I would like to point out, however, that our order specifies that re-tests must be requested and approved prior to actual testing. In the future if you wish to re-test a well for allowable purposes will you please schedule the well with this office prior to re-testing.

Yours very truly

Emery C. Arnold
Supervisor, District #3

BCA:ks

THE CONSERVATION COMMISSION
OF THE STATE OF NEW YORK
OFFICE OF THE COMMISSIONER
ALBANY, NEW YORK

January 1, 1910

Dear Sir:
Enclosed for you are
the reports of the
Commissioners of the
Department of Fish and Game,
and of the Department of Agriculture,
for the year 1909.

The reports of the Department of Fish and Game
show a very satisfactory increase in the number of
fish taken during the year 1909, and a corresponding
increase in the number of deer and other mammals
taken. The reports of the Department of Agriculture
show a very satisfactory increase in the number of
cattle, horses, and other animals taken during the
year 1909, and a corresponding increase in the
number of sheep and other animals taken. The reports
of the Department of Fish and Game also show a
very satisfactory increase in the number of birds
taken during the year 1909, and a corresponding
increase in the number of fish and other animals
taken. The reports of the Department of Agriculture
also show a very satisfactory increase in the number
of cattle, horses, and other animals taken during
the year 1909, and a corresponding increase in the
number of sheep and other animals taken.

Very respectfully,
The Commissioner

Re: L. L. McConnell Well No. 3
SW/4 Section 31-25N-3W
Rio Arriba County, New Mexico
South Blanco, Pictured Cliffs

Mr. E. C. Arnold
New Mexico Oil Conservation Commission
P. O. Box 697
Aztec, New Mexico

Handwritten note:
L. L. McConnell Well No. 3
SW/4 Section 31-25N-3W
Rio Arriba County, New Mexico
South Blanco, Pictured Cliffs

Dear Sir:

The 1962 annual deliverability test taken on the above subject well was 55 MCF gas per day, and the 1963 annual deliverability test was 132 MCF gas per day. Both tests were calculated using $P_d = 1/2 P_c$.

Summary:

1962 Annual Deliverability Test	1963 Annual Deliverability Test
$P_c = 704$	$P_c = 661$
$Q = 46$	$Q = 108$
$P_w = 442$	$P_w = 423$
$P_d = 352$	$P_d = 331$
$D = 55$	$D = 132$

During 1962, this well produced 27,610 MCF gas in 235 days for an average of 117 MCF gas per day.

We request the New Mexico Oil Conservation Commission to change the 1963 allowable basis for this well to the 1963 deliverability test calculated to the common base of the 1962 annual deliverability test, since it more nearly represents the producing characteristics of this well.

The 1963 annual deliverability test calculated using $P_d = .80 P_c$ has been submitted for the 1964 allowables.

Very truly yours,
SKELLY OIL COMPANY

J. W. George
