Re: Commingling of Pictured Cliffs and Chacra Zones.
Jicarilla "C" No. 12 2 - 33 - 25 - 5

Dear Mr. Chavez:

We hereby serve notice of our intention to commingle downhole the production from the Pictured Cliffs and Chacra zones of the subject well as authorized in Order No. R-5388. We feel that this will result in the production of otherwise unrecoverable reserves of hydrocarbons.

Static reservoir pressure in the two zones are expected to be of approximately the same magnitude at about 300 psig. Total production is expected to be 140 MCFGPM. Under Item 2 of the Order, 60 % of the production will be allocated to the Pictured Cliffs and 40% allocated to the Chacra.

In view of these developments, we also request that the subject well be exempted from the packer leakage tests scheduled for later this spring. Please address any questions to this office.
