If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

The McKenzie Federal #2 is currently TA'd in the Gallup. Elm Ridge Resources Inc. proposes to re-enter the well, drill out the bridge plug and deepen the well to evaluate the section of Gallup formation that wasn't originally drilled. We will set 3" liner through the Gallup, cement, perforate, stimulate and put the well back on production. We anticipate doing the workover in mid-summer of 1997.
