Re: Amerada #6 Jicarilla Apache "A"
NW $\frac{1}{4}$ Section 26-25N-5W, Rio Arriba
County

Gentlemen:

This letter will serve as your tentative approval for the dual completion of the above well as a gas-gas dual in the Graneros and Chacra zones.

It is understood that the well will be equipped as set out in your application and this approval is subject to the further requirement that a side door choke be installed on the 2-3/8" tubing above the packer so that bottom hole pressures may be taken.

Upon final completion, application for administrative approval should be made to Mr. A. L. Porter in Santa Fe, as set out in Rule 112.

Yours very truly

Emery C. Arnold
Supervisor, District #3

ECA:ks

1. *Chlorophyll a* and *Chlorophyll b* were determined by the method of Arar and Collins (1971). The *Chlorophyll a* and *Chlorophyll b* contents were expressed as $\mu\text{g g}^{-1}$ of dry weight.

[Faint handwritten notes at bottom]

1. The first part of the document is a list of references. The references are listed in two columns. The left column contains references to books and articles, and the right column contains references to books and articles. The references are listed in alphabetical order.

2. The second part of the document is a list of references. The references are listed in two columns. The left column contains references to books and articles, and the right column contains references to books and articles. The references are listed in alphabetical order.

3. The third part of the document is a list of references. The references are listed in two columns. The left column contains references to books and articles, and the right column contains references to books and articles. The references are listed in alphabetical order.

4. The fourth part of the document is a list of references. The references are listed in two columns. The left column contains references to books and articles, and the right column contains references to books and articles. The references are listed in alphabetical order.

5. The fifth part of the document is a list of references. The references are listed in two columns. The left column contains references to books and articles, and the right column contains references to books and articles. The references are listed in alphabetical order.

6. The sixth part of the document is a list of references. The references are listed in two columns. The left column contains references to books and articles, and the right column contains references to books and articles. The references are listed in alphabetical order.

7. The seventh part of the document is a list of references. The references are listed in two columns. The left column contains references to books and articles, and the right column contains references to books and articles. The references are listed in alphabetical order.

8. The eighth part of the document is a list of references. The references are listed in two columns. The left column contains references to books and articles, and the right column contains references to books and articles. The references are listed in alphabetical order.

9. The ninth part of the document is a list of references. The references are listed in two columns. The left column contains references to books and articles, and the right column contains references to books and articles. The references are listed in alphabetical order.

10. The tenth part of the document is a list of references. The references are listed in two columns. The left column contains references to books and articles, and the right column contains references to books and articles. The references are listed in alphabetical order.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

Dear Sir:

We intend to dual complete out Jicarilla Apache "A"
Well No. 6, located 1650' FNL and 990' FWL, Section 26,
T-25-N, R-5-W, Rio Arriba County, New Mexico in the following
manner.

Perforate Graneros Zone from 7088' - 7100' and 7106' - 7122'
and perforate Chacra Zone from 3722' - 3744'. Run Baker Model
D Packer & set in 7-5/8" Csg. at 3749' below the Chacra Zone to
separate the pay zones.

If further information is desired please advise.

Yours very truly,

D. F. Furse
