September 22, 1960

Well No. 22-1 is located 2000 ft. from S line and 1900 ft. from E line of sec. 22

22-1 Section 22 T23N, R4W 10W
(Of Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Undesignated Rio Arriba, County New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 7221 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well with rotary tools to an estimated depth of 8000' to test the Dakota, Greenhorn and Gallup formations. Approximately 500' of 1 1/8" surface casing will be run and cemented. If commercial production is encountered in these formations, we plan to run and cement a string of 4 1/2" casing to the Dakota, a string of 2 7/8" to the Greenhorn, and a string of 4 1/2" to the Gallup. Approval for a multiple completion of this type has been obtained from the New Mexico Oil Conservation Commission per Order No. N-1761.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
