

OIL CONSERVATION COMMISSION

1000 RIO BRAZOS ROAD

AZTEC, NEW MEXICO

June 8, 1965

Mike Abraham
918 Simms Building
Albuquerque, New Mexico

Dear Mr. Abraham:

We have checked casing and tubing data from the 1965 deliverability test which was recently submitted to this office for your #1 Yaffee well in Unit A, Section 6-25N-3W. We find that there is a discrepancy in the depth of the top of the tubing perforations. Our records indicate that the top of the perforations is located at 3770 feet and the test form shows 3964 feet. Will you please check this information and advise what is the correct figure.

Yours very truly

Emery C. Arnold
Supervisor, District #3

OLIGOMERIZATION COMMISSION

1000 RIO BRAZOS ROAD

ALBUQUERQUE, NEW MEXICO

Dear Sir,

Enclosed for you are
two copies of the
Albuquerque, New Mexico

Report, dated 1956.

We have checked the casting and found that the 1956
test which was referred to in your letter was
in Unit A, Section 5-15-16. The test was a
test of the top of the tubing pack. The test
then the top of the tubing pack is located at 1956 feet and the test
then shows 1956 feet. With your permission, this information and
results will be included in the report.

Very truly yours,

Dr. A. J. Smith
Albuquerque, New Mexico
