(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Elm Ridge Resources anticipates having the McKenzie Federal lease wells returned to commercial production on or before 7/7/97. The wells that this action affects are the McKenzie Fed. #1 and #3. The McKenzie Fed. #2 was TA'D by the previous operator. We have filed a sundry indicating our intention to fix the McKenzie Fed. #2 in the late summer of 1997. We have removed the gas lift system that was previously in place on these wells, set individual separators on the wells and we now have them metered individually on lease as well as a CDP at the compressor. We had been waiting on Williams Field Services to tie us in to a lower pressure line. That work has been completed recently.
