Abandon Chacra and Recomplete in Pictured Cliffs			

17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1113.

Due to low productivity it is planned to plug and abandon the Chacra formation and recomplete in the Pictured Cliffs formation in this well as follows:

Squeeze perforation (3390-3410')(3492-3502') with 50 sacks cement, using a top wiper plug to displace cement 150' above top perforation.

Selectively perforate and sandwater fracture the Pictured Cliffs formation.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
