Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

This gas well was originally dually completed (03-17-77) from the Pictured Cliffs (perfs 2,766'-2,776') and the Chacra (perfs 3,622'-38'; 3,638'-41'; 3,647'-51' and 3'734'-37') 2 3/8" OD tubing was set at 3,716' with a packer and seal assembly at 2,836'.

The New Mexico Oil & Gas Conservation Commission approved the commingling of the gas production from the Pictured Cliffs and Chacra formations with Order No. R-5819 dated September 25, 1978.

On September 14, 1978, the 2 3/8" tubing was raised 8' thereby unseating the seal assembly from the packer. This allows the Pictured Cliffs gas to go down thru the packer around the tubing and be produced up the tubing with the Chacra gas.

First production of commingled production was on September 29, 1978.

18. I hereby certify that the foregoing is true and correct
