(Note: Report results of multiple completion on well Completion or Recompletion Report and Log form)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting and proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Four Star Oil and Gas Company requests approval to surface commingle both oil and gas production from the following wells located on the Lydia Rentz lease: Lydia Rentz #1, #7, #7A, #9, #9A, #11 and #11A. Oil production is gathered at two separate tank batteries located on the lease. Gas production feeds El Paso Field Services CDP meter No. 87932, also located on the lease. Attached is a diagram showing the location of the wells, the gathering lines, the two tank batteries, and the CDP meter. Also attached is a spreadsheet containing specific information on the wells tied to the gathering system. Both gas and liquid is metered at each well ~~commingling~~ for allocation purposes. Commingling is within a single lease (SF-079601) where ownership is identical throughout, including working interest, royalty interest and overriding royalty ownership.
