Attention: Mr. F. T. Chavez

RE: Administrative Order DHC-998
L. L. McConnell No. 14
Unit D, Section 29, Township 25 North, Range 3 West, NMPM,
Rio Arriba County, New Mexico.
Blanco Mesaverde Gas and West Lindrith Gallup-Dakota Oil Pools

Texaco Exploration and Production Inc. has completed the Mesaverde formation in the subject well and has downhole commingled with the Gallup-Dakota as per NMOCD Administrative Order DHC-998. In accordance with our instructions on the approval letter (dated 4/18/94) we are requesting an allocation formula from your office. Prior to the workover the Gallup-Dakota was averaging 45 BOPD, 52 MCFD and 0 BWPD. Attached is a decline curve for the well prior to the workover. The Mesaverde formation was isolated with a CIBP from the Gallup-Dakota during the workover. Mesaverde production stabilized at 45 MCFD, 3 BOPD, and 139 BWPD after 20 days of testing. Therefore, we recommend the following allocation factors for the commingled production:

	Gallup/Dakota	Mesaverde
Oil	$45/(45+3)=0.94$	$3/(45+3)=0.06$
Gas	$52/(52+45)=0.54$	$45/(52+45)=0.46$
Water	$0/(0+139)=0.00$	$139/(0+139)=1.00$

If you have any questions concerning this request please contact Mr. Mark R. Reinhold at (505) 325-4397 ext. 19. Your attention to this matter is greatly appreciated.

Sincerely,

Ted A. Tipton
Area Manager
