13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

McElvain originally permitted this well as a Mesaverde/Dakota well. Attempts to complete the Dakota zones have not yielded economical production levels. The well had been completed in the Mesaverde and will be produced only from this zone. A CIBP has been set above the Dakota at 7930' and tested to 3000 psig.
