(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

July 11, 19 62

McKenzie Federal
Well No. 1 is located 990 ft. from N line and 890 ft. from W line of SW/4 SW/4 Sec. 25
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Otero Gallup Rio Arriba New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6676 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Ran 2" line from discharge of compressor 1175' and tied into casing on McKenzie Federal #1 Gallup to inject lift gas into well. The well is being produced with a free piston and gas has declined to a point where it alone will no longer lift the piston. Gas for this installation is being metered at the compressor station.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
