Federal-Gapp
Well No. 1 is located 660 ft. from [N] line and 660 ft. from [E] line of sec. 28
NE_{1/4} of NE_{1/4} of Sec. 28 28N 8W E.H.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wilcox San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the G. L. ~~surface~~ above sea level is 6752 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well to a depth sufficient to test the Gallup Sandstone Formation, such depth estimated to be not more than 5,500 feet. 8 5/8 inch surface casing will be cemented at approximately 150 feet, circulating to top of ground with 200 sacks of cement. We will drill a 7 7/8 inch hole through the Gallup, and run electric logs, using rotary tools. If production string is necessary we intend to cement 5 1/2 inch, 15.5 pound, casing with 250 sacks of cement through the producing horizon and perforate. Sand-oil free will be carried out if found advisable.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
