Well No. 2 Scott is located 660 ft. from N line and 660 ft. from E line of sec. 3
NW/4 Section 3 24N 10W N. M. P. M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Bisti San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the Ground ~~drill~~ floor above sea level is 6838 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I propose to drill this well to a depth of 5450 feet, set 5-1/2" casing (14 lb.) and cement with 200 sacks of cement. I expect to encounter the Lower Gallup sand at about 5340 feet and take a 50 foot core at this depth. I also propose to set 160 feet of 10-3/4" surface casing with 125 sacks cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
