13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Request continuation of long term shut in while evaluating new technology that will allow underreaming of the open hole coal sections. Increasing the size of the open hole section should allow adequate production rate to allow this well to be connected to a sales line.
