NOTICE OF INTENTION TO ABANDON WELL			

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Well No. 2-26 is located 825 ft. from N line and 510 ft. from E line of sec. 26
SW SW 26 25 N 6 W NMP
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
undesignated Dakota Rio Arriba New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6667 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate casing points, and all other important proposed work)

We propose to drill to the Dakota formation about 7100 feet. If production is encountered we propose to set casing through the prospective pay, perforate and sand the well. We propose to ductly complete in the fallup also if production is encountered there. If a failure we will contact the USGS at Farmington for plugging instructions. We propose to set 300 feet of 9 5/8" surface casing and circulate cement to surface. We propose to drill an 8 3/4" hole.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
