(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is \_\_\_\_\_ ft. **To be reported later.**

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

To drill a well to the top of the Picture Cliff formation, set production string and drill in with gas as a circulating medium.

To set approximately 150' of 10-1/4" O.D., 32.75#, casing for surface pipe and cement to surface.

To set approximately 3000' of 7" O.D., 20#, J-55 casing for production string on top of the Picture Cliff formation and cement in accordance with top approved regulations and practices used in that area.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
