[illegible]

the β phase of the polymer. The β phase is the more ordered phase and is characterized by a higher density and a higher melting point than the α phase. The β phase is the more stable phase and is the one that is most commonly observed in nature. The α phase is the less stable phase and is the one that is most commonly observed in the laboratory. The β phase is the more ordered phase and is characterized by a higher density and a higher melting point than the α phase.
