NOTICE OF INTENTION TO ABANDON WELL.....	

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Well No. 12-2 is located 1000 ft. from N line and 500 ft. from E line of sec. 12
12 (1/4 Sec. and Sec. No.) 25 N (Twp.) 6 W (Range) R. 1 E. S. 1 N. (Meridian)
Santa Fe Canyon (Field) San Juan (County or Subdivision) N. M. (State or Territory)

The elevation of the derrick floor above sea level is 6300 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

July 29 - August 3, 1955. Sand frack workover.

Moved in cable tools, pulled tubing, drilled and bailed on bridges from 1275 to 5415 ft. Got about two wheelbarrows full of sand and savings out of hole. Fracked well with 5000 gal / 12,000 of sand. Flashed with 50 bbls of free fluid and cruds. Injection rate, 22 bbls/min; injection pressure, 1200 on chart, showed 1200 on gauge, no breakdown. Checked well after free and had to use sand pump to remove about 50' of free sand. Sealed 1" tubing without change. Well back on line on August 3, 1955.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
