DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to use 4-1/2" 11.6# J-55 Seamless Casing top to bottom instead of 5-1/2" casing as proposed in Notice dated June 2, 1962. Cementing program is to be:

1st Stage: Through casing shoe with 150 sks. 12% aquagel cement containing 12# gilsonite per sack followed by 100 sks. latex cement

2nd Stage: Three stage cementing collar at approximately 5600' with 570 sks. 12% aquagel cement containing 12# gilsonite per sack (to cover Mesa Verde and Pictured Cliffs zones)

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
