(other)			

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Having re-completed this well in the Gallup horizon (7280'-7265'), Amoco Production Company was unable to drill out the bridge plug isolating the Dakota horizon. Successive attempts to do so have caused severe casing damage in the immediate vicinity of the bridge plug (7400'). Amoco has therefore abandoned the Dakota formation in this well by setting a cement retainer at 7341' and squeezing off with 100 sx Class "B" Neat cement.

U.S.G.S. verbal approval received 4/23/80 per telecon Schiller to Kuchera.
