17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

In the Application to Drill we asked for permission to drill and complete a Dakota well. The well was drilled to the Dakota and perforated and fractured and tested. As a result of the testing, it has been determined that the Dakota zone is unproductive. We now request permission to squeeze the Dakota perforations and perforate and stimulate the Mesaverde zone.
