13. Describe Proposed or completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Merrion Oil and Gas proposes to temporarily abandon this wellbore by setting a cast iron bridge plug at +/- 6328' KB (50' above the top Gallup perf), then pressure testing the plug to ~~300~~ 500 psi and circulating packer fluid. There is potential in this field for a Gallup waterflood, therefore the wellbore may be of use in the future.
