17. Describe Proposed or Completed Operations:

6-3-97 Tests conducted on this well indicate that the tubing is partially plugged.

We intend to pull and salvage 1 1/4" tubing.

Then run new 2 3/8" tubing to approximately 7400' with model R-3 packer set at approximately 6900' and reverse flow check valve installed immediately above packer.

No new surface will be disturbed, location area will be cleaned up when work is completed.

Estimated starting date: July 30, 1997
