_____ July 18, 1956 _____, 19____

N. H. Federal _____
Well No. 14 is located 1940 ft. from [N] line and 1940 ft. from [E] line of sec. 8

38/A - 1 - 14 (1/4 Sec. and Sec. No.) 25N (Twp.) 12E (Range) 34N (Meridian)

Blatt-Gallup (Field) Bl. 1400 (County or Subdivision) Bl. Mexico (State or Territory)

The elevation of the derrick floor above sea level is 6201 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The 5 1/2" casing was perforated from 4245-50 and 4257-61 with 6 "L" gun bullets over ft. This section was treated with 10,000 gal. sand & 10,000 gal. lease oil. A cementing bridge plug was set 4200'. The zone 4772-21 was perforated with a 2 1/2" gun bullet. This zone was treated with 15,000 gal. lease oil & 15,000 gal. sand. The original plan was to set a 2 1/2" tubing from 4200' and to the well bottom, but it failed during 7-2-56.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Sunray, Inc. - owner of lease
