Well No. **1** **Waxman** is located **660** ft. from **[N]** line and **660** ft. from **[E]** line of sec. **9**
NE 1/4 NE 1/4 Sec. 9 **25N** **10W** **NMP**
(Field) (County or Subdivision) (State or Territory)
Wildcat **Gal.** **San Juan** **New Mexico**

The elevation of the derrick floor above sea level is **6435** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to re-enter the former E. P. Campbell #1 Pipkin, total depth 6551, drill out cement plugs, set 2700 feet of new 5-1/2" casing with bow set on old 5-1/2" casing still in the hole, perforate Dakota sandstone from approximately 6382-84, and 6410-44, and water sandfrac.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
