Central Resources, Inc. plans to plug or reactivate the well in 1999. As part of the routine for response to the BLM's request for plugging the wells based on a sundry of 1991 vintage, I discovered correspondence in the records that would indicate plugging may not be the best course of action to conserve resources.

We request an extension of the 1991 plugging approval sundry to the end of 1999 to:

- a. allow time to evaluate the merit of the well's remaining resources
- b. allow time to evaluate and acquire the rights to the Mancos for development (it is less than 15' below the casing shoe)
- c. provide the opportunity to include the plugging operations with the other wells we plan to plug in 1999
