SUBSEQUENT REPORT OF:

RECEIVED
DEC 15 1982
U. S. GEOLOGICAL SURVEY
FARMINGTON, N. M.

(NOTE: Report results of multiple completion or zone change on Form 9-330.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Production from the subject well has ben regained; it averaged 31 MCF/D for the ninety day evaluation period. This compares well to the pre-casing leak average of 36 MCF/D. We are currently evaluating the economics of repairing this old marginal well.

If the economics are favorable, then this well will be permanently repaired. If the economics are not favorable, then this well will be plugged and abandoned.

It is hereby requested to continue to produce the subject well in its temporarily repaired state for one year, or until market conditions improve, whichever time is lesser.

Subsurface Safety Valve: Manu. and Type Approved until July 15, 1983 Set @ Ft.

18. I hereby certify that the foregoing is true and correct
