Blanco Pictured Cliffs

Rio Arriba

New Mexico

The elevation of the derrick floor above sea level is 6056 ft.

DETAILS OF WORK

(Show names of wells, depths, etc., show areas, heights, or lengths of proposed casing, indicate mudding, etc., cement, etc., and all other important proposed work.)

It is intended to re-work this well in the following manner:

1. Rig up and fish out 100 joints of 1" tubing remaining in the hole.
2. Clean out with mud to 2430'.
3. Run a full string of 2 7/8" production casing and cement to surface.
4. Perforate and fracture desired intervals in the Pictured Cliffs formation.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
