SUNDRY NOTICES AND REPORTS ON WELLS

The elevation of the derrick floor above sea level is (Merdian) DETAILS OF WORK (State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobing points, and all other important proposed work) It is intended to drill a dually complete a well in the rictured Cliffs for seas verie formation. Mad circulating will be used thru the Pictured Cliffs are timpermediate casing. Cas circulating will be used thru the Nesa Voi a production liner will be set. Tasible productive intervals will be a fractured. Estimated Total Depth 2020'. Casing Program: 10 3/4 at 1/4' with 125 sacks consent circulated to the surf casing 1/2 liner at 5050' with 300 sacks consent. 5 1/2 liner at 5050' with 300 sacks consent. The 5/2 of Section 5 is dedicated to the Pess Vorde. MAY 2012 of Section 5 is dedicated to the Pictured Cliffs. MAY 2012 of Section 5 is dedicated to the Pictured Cliffs.	NTION TO TEST WATER SHUT-OFF	EPORT OF SHOOTING OR ACIDIZING
