Gentlemen:

I have examined the application dated 11-5-74
for the El Paso Nat. Gas Co SJO 27-4-133 U. 27-27N-4W
Operator Lease and Well No. Unit, S-T-R

and my recommendations are as follows:

Logography has been verified. approve

Yours very truly,

Curry C. United

El Paso Natural Gas Company

El Paso, Texas 79978

November 5, 1974

ADDRESS REPLY TO
POST OFFICE BOX 980
FARMINGTON NEW MEXICO 87401

Mr. A. L. Porter, Secretary and Director
New Mexico Oil Conservation Commission
Post Office Box 2088
Santa Fe, New Mexico 87501

Dear Mr. Porter:

This is a request for administrative approval for an unorthodox gas well location in the Basin Dakota pool. Terrain features make an orthodox location and access road expensive to build and maintain.

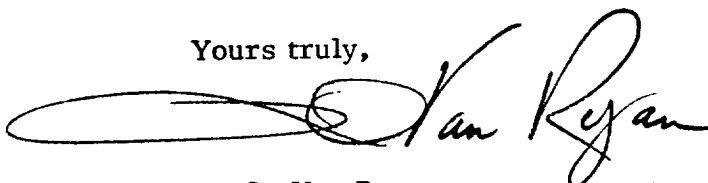

It is intended to locate the El Paso Natural Gas Company San Juan 27-4 Unit #133 2335' from the South line and 2225' from the West line of Section 27, T-27-N, R-4-W, NMPM, Rio Arriba County, New Mexico. The West half of Section 27 is dedicated to this well.

The terrain in the West half of Section 27 is very rough. An orthodox location would require an access road with a greater than 12% grade which would be expensive to build and to maintain. Maintenance would be expensive because of erosional problems encountered in roads with this steep of a grade. For these reasons it is requested that the unorthodox location be approved.

All of the offsetting proration units are included in units of which El Paso Natural Gas Company is the operator.

Plats showing the proposed well location with terrain features and operator of offset leases are attached.

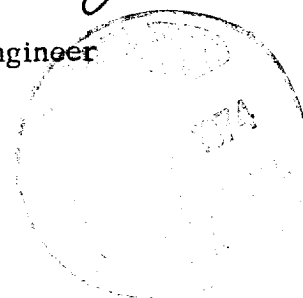

Yours truly,

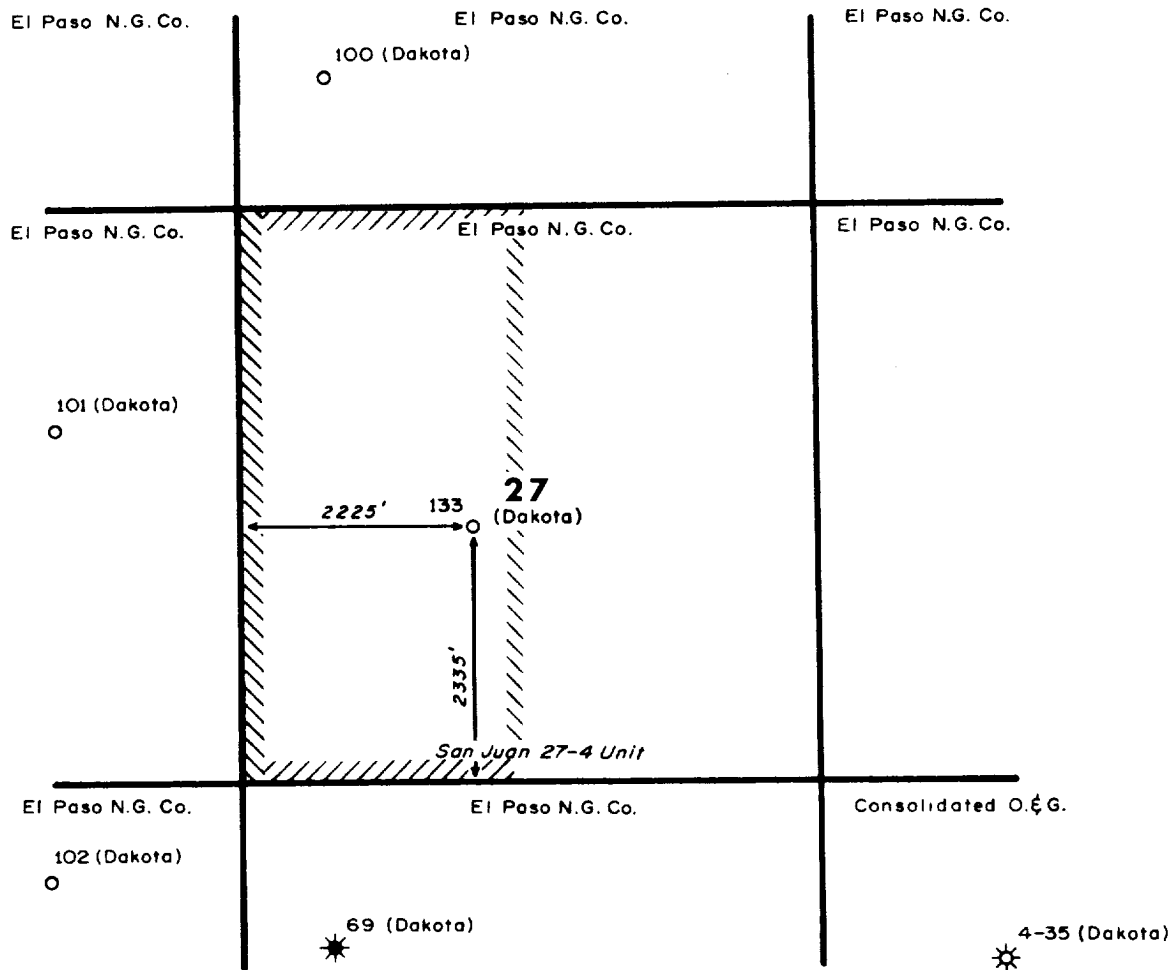

L. O. Van Ryan
Senior Petroleum Engineer

Re: Application for Permit to Drill
San Juan 27-4 Unit #133
SW/4 Section 27, T-27-N, R-4-W
Basin Dakota

Dear Mr. Long:

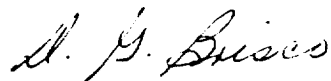

Details regarding existing roads, pipelines, wells, etc. relative to the above well location are included on the previously submitted base maps, "Field Road Map" and "Composite Map No. 1".

The proposed new well location, new roads and new pipeline are shown on the attached plat along with connecting existing roads and pipelines in the vicinity of the proposed new well.

Water for drilling and completion operations will be obtained from the following location: a water hole located in the SE/4 Section 18, T-27-N, R-4-W.

Waste material will be disposed of by burial in the burn pit, latrine, or reserve pit as applicable. There will be no camp nor air strip associated with drilling this well. Upon completion or abandonment of this well, the location will be cleaned and leveled and a dry hole marker placed, if applicable.

Yours very truly,

D. G. Brisco
Drilling Clerk
