

EL PASO NATURAL GAS COMPANY

OIL WELL TEST

To: A. J. Dudenhoeffer

Date: October 29, 1959

From: Production Engineering Department

Place: Farmington, New Mexico

SUBJECT: Pumping test on El Paso Natural Gas Company well Huerfano Unit No. 112
(Gallup)

Tested By: K. C. McBride

Location Sec. 17 T26 R10

Shut-In Pressure SIPC 1031 psig; (Shut-In 15 Days)
SIPT 199 psig

Time and Date Test Started 10:30 A.M. Oct. 23, 1959

Time and Date Test Ended 10:30 A.M. Oct. 24, 1959

Total Production 24 hours Gas 291.76 MCF
Oil 167.87 Bbls.
Water 0 Bbls.

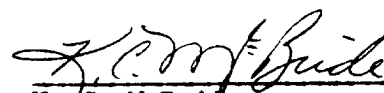

Gas-Oil Ratio 1738 Cubic Feet Per Bbl.

Producing Method Pumping

Producing through 2" Choke Setting 30/64 Inches
Flowing Pressure 155 psig Tubing; 558 psig Casing
SPM 11 Length of Stroke 74

Producing Formation Gallup

Field Undesignated

K. C. McBride
Production Engineer
