February 27, 1951

Well No. 42 is located 120 ft. from S line and 250 ft. from W line of sec. 18

20N (1/4 Sec. and Sec. No.) 20E (Twp.) 10 (Range) 100M (Meridian)
King's Extension (Field) King's (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 5120 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to plug and abandon this well due to hole taking substantial water and non-commercial amount of gas, by the following means:

Set cast retainer approximately 200' above casing shoe. Place a cement plug from retainer to total to be 2300'. Cut and pull casing. Place a cement plug from 90' above water bearing sand at 1550' to 50' inside remaining casing since cement plug from surface to approximately 200' inside surface casing. Place marker on surface.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
