17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

We believe that the Dakota Formation in the above well is still capable of commercial production. However, the current spot market price of gas is insufficient to justify the costs of working the well over. Therefore, we are requesting a long term shut-in status to give market conditions a chance to improve.
