PROPOSED CASING AND CEMENTING PROGRAM

SIZE OF HOLE	SIZE OF CASING	WEIGHT PER FOOT	SETTING DEPTH	QUANTITY OF CEMENT
17-1/4"	13-3/8"	484	100'	160 sx
12-1/4"	9-5/8"	40#	1500'	500 sx
8-3/4"	7:1	204, 234, 264	6600'	265 ax

Well will be drilled through the Morrison water momes and 9-5/2" intermediate casing set. Well will then be drilled through the Pennsylvanian "D" and completion designed from epen hole logs. A copy of all logs will be furnished upon completion. Copy of the Location Plat is attached.

IN ABOVE SPACE DESCRIBE PROPOSED PROGRAM: If proposal is to deeped or plug back; give data on present productive sone and proposed new productive zone. If proposal is to drill or deepen directionally, give pertinent data on subsurface locations and measured and true vertical depths. Give blowout preventer program, if any.

Original Signed by 8. E. McClingy	TITLE Area Engineer	December 10, 197
(This space for Federal or State office use)		
PERMIT NO.	APPROVAL DATE	
APPROVED BY CONDITIONS OF APPROVAL, IF ANY:	TITLE	DATE

Instructions

General: This form is designed for submitting proposals to perform certain well operations, as indicated, on all types of lands and leases for appropriate action by either a Federal or a State agency, or both, pursuant to applicable Federal and/or State laws and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 1: If the proposal is to redrill to the same reservoir at a different subsurface location or to a new reservoir, use this form with appropriate notations. Consult applicable State or Federal regulations concerning subsequent work proposals or reports on the well.

Consult local Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. State or Federal office for specific instructions.

Item 14: Needed only when location of well cannot readily be found by road from the land or lease description. A plat, or plats, separate or on this reverse side, showing the roads to, and the surveyed location of, the well, and any other required information, should be furnished when required by Federal or State agency offices.

Items 15 and 18: If well is to be, or has been directionally drilled, give distances for subsurface location of hole in any present or objective production zone.

Item 22: Consult applicable Federal or State regulations, or appropriate officials, concerning approval of the proposal before operations are started.

DEVELOPMENT PLAN FOR SURFACE USE NAVAJO TRIBAL "P" NO. 5 SAN JUAN COUNTY, NEW MEXICO

Amoco Production Company proposes to drill the proposed well with rotary tools on a graded location as shown on the attachment. The location is in accordance with N.M.O.C.C. Order R-2758. Established roads exist to the approximate center of the section and approximately 4,500 feet of new road will be constructed. Archeological clearance to drill the location has been obtained from the proper authorities. Clearance for this work has been obtained from the Navajo TRibe.

No airstrips or field camps exist nearby. There are no trees in the area, and no timber damage will result. Vegetation is very sparse in this area. The well is located in an active producing oil field and we have previously completed a water source well. All water for drilling will come from this well. Upon completion of subject well, the location will be cleaned and reserve pit backfilled.

Drill Site NE/4 NE/4 Section 7, T-26N, R-18W

Amoco Production Company scale: None
