## 13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Request permission to continue testing this well to determine if connection to gas sales line is economically feasible. A pump jack was installed to test gas production in December, 1998. We have had difficulty in getting the unit to run for a long enough period of time to adequately test production. We are evaluating the possibility of plugging this well and drilling a replacement. The difficulty of obtaining a drilling location on the split estate lease is our hold-up on making this decision. We ask that we be given as long of a test time as the BLM deems appropriate. We should be able to make the decision by August 1, 1999.
