RE: Request for Approval of Unorthodox Well Location,
San Juan County, New Mexico

Gentlemen:

Please consider this letter as a request for approval of the below
referenced unorthodox well location:

O. H. Randel #11
1650' FSL & 1980' FEL
Sec. 10-T26N-R11W

This well was originally permitted as a 40-acre well to be drilled
to the Gallup formation. After the permit had been approved, we
submitted a 80-acre dedication with the same footage. The well
was then drilled without realizing that the Gallup formation in
this area was covered under separate spacing regulations (Gallegos
Gallup), allowing a different window. The state office in Aztec
notified us of the discrepancy and indicated the need to file this
request.

This well is immediately adjacent to our #2-E well and, in fact,
shares the same well pad. The well could have been moved the 130'
prior to drilling had we been aware of the special spacing regula-
tion. We realize that this situation is our mistake, however, we
would appreciate your consideration of the circumstances. Attached
is a plat showing ownership of affected leases. BHP Randel lease
covers all of Sections 9, 10 and 15, T26N-R11W. ERG is the offsett-
ing operator of all offsetting proration units.

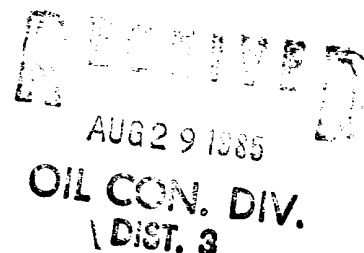

If there are any problems or questions, please call.

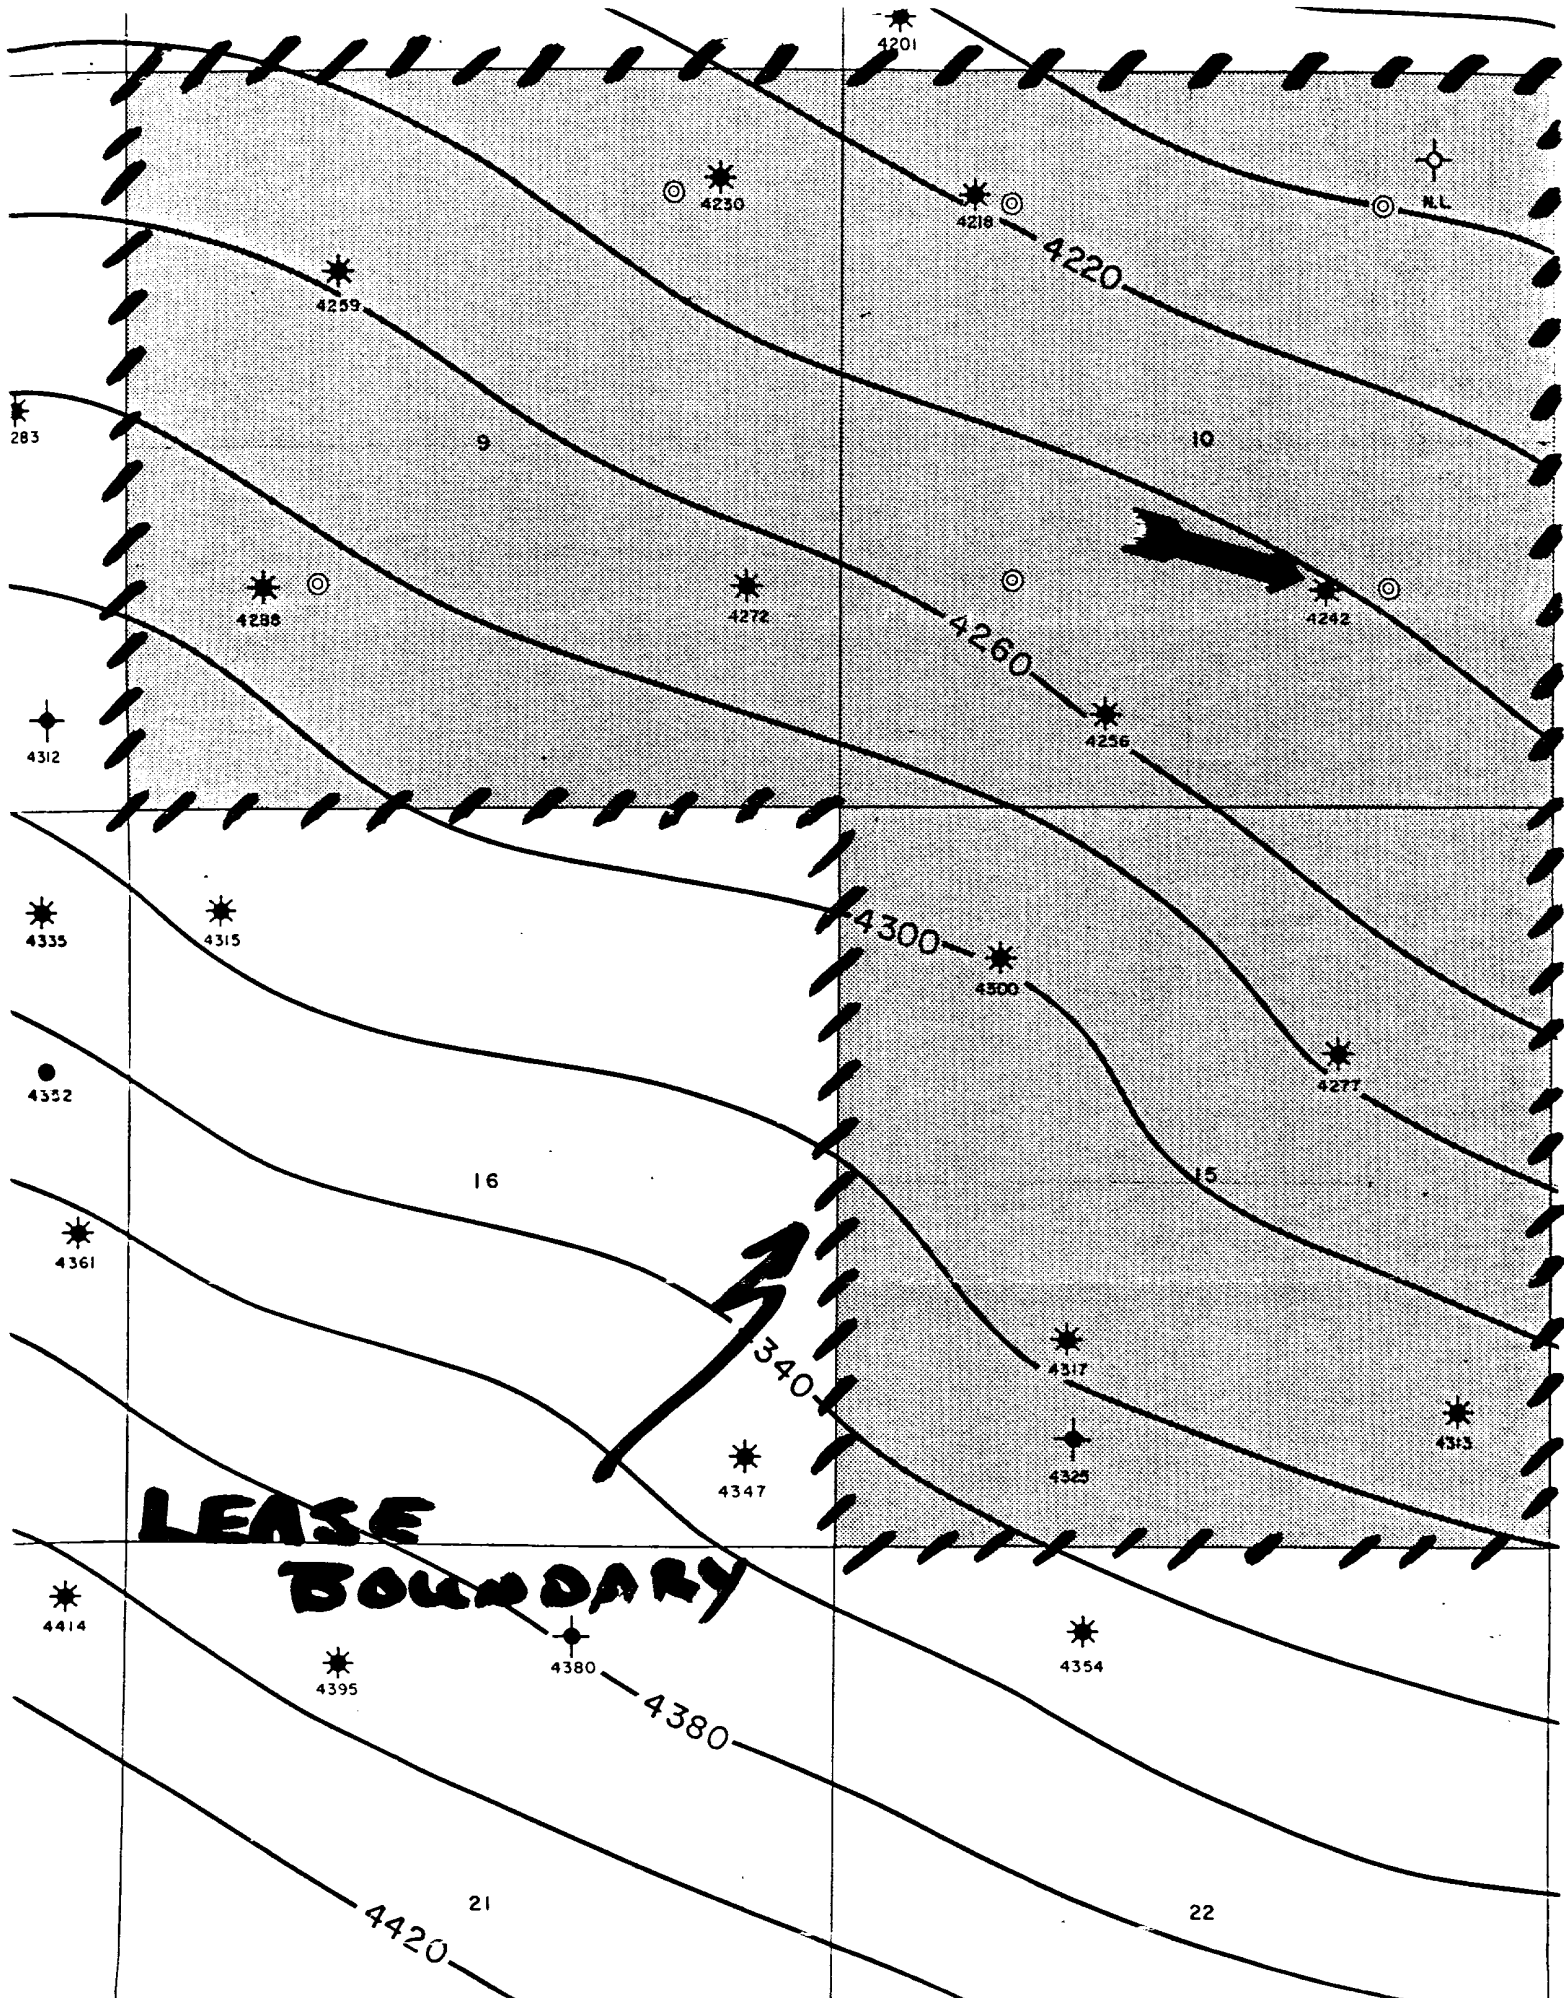

Very truly yours,
BHP PETROLEUM (AMERICAS), INC.
