U. S. GEOLOGICAL SURVEY
FARMINGTON, N. M.

CC CH. DIV.

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

It is intended to resume fishing operations to recover the remaining tubing in the wellbore. The Baker packer will be milled out and the well cleaned out to total depth. A new packer will be set at approximately 3494' and new strings of 2 3/8" and 1 1/4" tubing run to isolate the two zones. Currently, we are waiting on interest holder approval to begin this work.

Monitor every 30 days for commencement of operations.

Subsurface Safety Valve: Manu. and Type _____ Set @ _____ Ft.

18. I hereby certify that the foregoing is true and correct.
